RAILWAY RESERVATION SYSTEM

The Purpose of this Source is to describe the railway reservation system. It provides the train timing details, reservation, billing and cancellation on various types of reservations.

The System will have 2 types of users: Admin and Customer.

* **Admin**: These are the people who add, update, delete, view, and search the database. They ensure that the availability data and status of available tickets are correct. They also handle any delay in the train and being updated with admin access.

They play a most important role for any update in data.

* **Customer**: These are the people who check for availability.

of seats in train status of booked or CN. They can book tickets with different modes of payment. USP code the can even get updated with tickets and status of tickets.
