## College Information System

The main objective of our project is to maintain information about student, employee and other activities in attached student records for payment and salary payment etc. The information stored for diff. money in the file for a better process with our organization.

The System has 3 types of user Admin, student.

### \* Admin

Admin are the people who play important roles in modification of student records, such as monitor of subject and many other. They are helpful in managing the records and database of student employee.

### \* Teachers

They are the people who create class for their subject department and update in and out so that student can join through that link to attend our class. They can manage the entire database of student.
